CALCUTTA:
PRINTED BY J. SHAKELL,
M,DCC,LXXXVII.

I N T R O D U C T I O N.

THE author of the following tables of batta, exchange, interest, and commission, is induced to submit them to the service of the public, from a hope that the variety of calculations they contain, beyond any earlier publication of the kind, will recommend them to favor, by rendering them of more general utility to the tradesman, the merchant, and the private gentleman: the man of business, whose time is very valuable to him, is here assisted in a variety of tedious and interesting calculations, and the individual may here (the author flatters himself) make reference with security; and with little labour, and less difficulty satisfy himself that he is not defrauded in the adjustment of his accounts, none of which are to be determined in Bengal without calculations of batta (that is an agio on the rupee) so numerous and so various, that the benefit of tables to abridge the labor and check both error and imposition must be acceptable.

The calculations of exchange, interest, and commission, altho' not required in every payment as the batta table is; must be called for so constantly in the course of business, that an assistance of this kind cannot fail of its utility.

The first table, from page 1 to 16, contains calculations of batta from 1 per cent. to 16 per cent. and upon any sum of money from one pice to one hundred thousand rupees, and from thence may be ascertained the equivalent sum in current rupees of any given number of arcot rupees, sonaut rupees, or ficca rupees, according to the respective batta that they bear in accounts.

By way of example, in the use of these tables, suppose it be required to determine how many current rupees are in the sum of ficca rupees 5550 12 6; as ficca rupees bear 16 per cent. batta, reference must be had to page 16, and in the first column will be found the 16 per cent. rupees—

S. Rs.	Batta.	C. Rs.	D. Ps.

6	960	6 960	
S. Rs. 5550 12 6	888 2 . .	6438 14 6 .	

The second table, from page 17 to 24, contains the exchange of current rupees into rupees of different per centages from one per cent. up to sixteen per cent.—and this table will be found useful, as engagements are often made to be paid in particular species of rupees bearing a fixed batta, and as the established coin is ficca rupees, which is 16 per cent. superior to the current. It may be proper to remark here, (tho' it cannot be very necessary, it being so well understood) that the difference between any kind of rupee and the current, is always calculated in currency, so that altho' 16 per cent. rupees are 8 per cent. better than those which are 8 per cent. above currency,

I N T R O D U C T I O N . v

rency, yet one hundred 16 per cent. rupees are not equal to one hundred and eight 8 per cent rupees. but to one hundred 8 per cent. rupees, increased by the additions of eight current rupees reduced to that centage, that is rupees 7 6 6—making the sum of 8 per cent.—rupees 107 6 6—the equivalent to one hundred 16 per cent. rupees; and vice versa, one hundred 8 per cent. rupees, because 8 per cent. less in value than the 16 per cent. rupees do not equal 92 of that sort; but 100 lessened by the reduction of 8 current rupees, reduced to value in that centage, viz. rupees 6 14 4 making the the sum 93 1 8 sixteen per cent. rupees equal to one hundred eight per cent. rupees; and so of all the other kinds.—By way of example under this table—suppose current rupees 25355 12,—are to be paid in ficca or 16 per cent. rupees—in page 24—

The fourth table, from page 28 to page 38; contains the exchange between Calcutta and London, and shews the equivalent in pounds sterling from 100,000 current rupees, to one pice—beginning at the exchange of 1s. 8d. and concluding with the exchange of 2s. 6d. per every current rupee.

The fifth table, from page 39 to page 49, contains the exchange between London and Calcutta from 10,000 pounds to one farthing, at the same rates of exchange as the foregoing.

The sixth table, from page 50 to page 72, contain calculations of exchange between Calcutta and Madras from 100,000 current to one pice, beginning at the exchange of 375 and concluding with 420 rupees for 100 pagodas.

The seventh table, from page 73 to page 95, contains calculations of exchange between Madras and Calcutta, at the same rates as the foregoing, and from 50000 pagodas to one cash.

The

I N T R O D U C T I O N. vii

The tables of exchange with London and Madras, are specified in current rupees, but if the exchange with the former was at 2s. more or less, for the arcot or sicca rupee, or with the latter at 400 arcot rupees, more or less, for 100 pagodas, the tables shew the equivalent.

The eighth table, from page 97 to page 201, contains calculations of interest from 8 to 12 per cent. from 1 to 29 days, and from 1 to 12 months—and from 100,000 rupees to 1 pice.

The ninth or last table, from page 202 to 212, contains calculations of commission from $\frac{1}{4}$ to 10 per cent. upon any sum as far as one hundred thousand rupees.

The author begs leave to assure the public, that he has exerted the utmost diligence and attention to render these tables correct, as well as comprehensive, and he trusts to the generosity and indulgence of those who may adopt the use of them, to excuse and to correct any trifling error that may appear, and which is very possible to have escaped his notice in such a variety of calculations.

vi INTRODUCTION.

lack of rupees; and these comparative values have been ascertained by the medium of the batta each is charged with when brought into current rupees.

For instance, S. Rs. 10330 4 2 are to be paid in sonauts, in page 25—
